Introducing The First Professional Quality Modem In Kit Form...

The Pennywhistle 103

The Pennywhistle 103 Acoustic Coupler is the first professional quality modem available in kit form. The Pennywhistle may be used either as an acoustic coupler (with the telephone handset) or it may be wired directly into the telephone. In either case, the Pennywhistle will operate in both the half-duplex (unidirectional) or the full-duplex (bidirectional) modes.

The Pennywhistle 103 is capable of recording data to and from audio tape without critical speed requirements for the recorder and it is able to communicate directly with another modem and terminal for telephone "hamming" and communications for the deaf. In addition, it is free of critical adjustments and is built with non-precision, readily available parts.

One of the most significant problems associated with modems is that there is often difficulty in determining the difference between a signal of the proper frequency and one of its harmonics. The Pennywhistle 103, however, employs a *three-stage* active filter which prevents noise and harmonics from getting through.

The Pennywhistle kit includes everything needed for the entire unit. All electronic components mount on a 5" by 9" printed circuit board. The kit also includes all chassis parts, speakers, speaker grilles, muffs and line cord.

But just as important, the Pennywhistle is backed up with a complete documentation manual. This manual describes — in detail — what a modem is and how it works. All theory of operation discussions are keyed to a block diagram and schematic. This manual also contains a thorough set of assembly, test and adjustment instructions as well as directions for hooking the Pennywhistle up

for direct wire connection, modem-to-modem communication, tape recorder connection and long distance use.

The Pennywhistle 103 modem kit is \$109.95 (plus \$2.50 for postage and handling) and is available from M&R Enterprises, P.O. Box 61011, Sunnyvale, Ca. 94088. California residents add 6% sales tax. Allow approximately four weeks for delivery.
